Butler Smiles Dental Care is the dental practice of Dr. Robert Todd and is located at 291 Evans City Rd. in Butler Township, at the intersection of South Duffy Rd. and Evans City Rd. (Rt. 68). The practice has been at that location for 14 years, although Dr. Todd has been providing dental care in this area since 1980. Prior to the current location he had a dental practice in East Brady for 20 years.

Dr. Todd received his undergraduate degree from Penn State University in 1976 and his dental degree from the University of Pennsylvania in 1980. After serving for two years in the United States Public Health Service he started his private dental practice in East Brady in 1982.

Dr. Todd has always strived to offer the best and most up-to-date dental treatment possible. He has been aided through the years in that endeavor by having a loyal and dedicated team working with him – several of whom have been with him for more than 20 years! The long-term relationships that have developed between the staff and the patients make for a very family oriented atmosphere in the practice.

Dr. Robert Todd

Butler Smiles Dental Care is a general dental practice offering all dental services, but some of special note are: single visit dental crowns utilizing Cad-Cam technology, digital radiographs to improve film quality and reduce radiation exposure, implant placement and restoration (including denture stabilization), oral appliance therapy for treatment of sleep apnea, laser therapy for gum disease treatment and orthodontics (including Invisalign and adult short-term treatment).

New patients are always welcome at Butler Smiles Dental Care. Our team is ready to talk with you to answer your questions and ease your anxiety about dental treatment. Please visit us at www.butlersmiles.com or call 724-282-7774.
