

Practice Continues To Grow

Husband and wife team, Dr. Michael McGrath and Dr. Jennifer McGrath serve the patients of Butler/Chicora Eye Care at both of their convenient locations. They have added Dr. R.G. Withey as an associate at the Butler location to handle an increased demand for services at that location. By incorporating multiple doctors in both locations, the practice is able to provide convenient hours, more support for a larger patient base, and offer more sophisticated testing with state-of-the-art equipment.

Continuing education and excellent customer service is a priority for all the doctors of the practice. Dr. Michael McGrath was awarded Western PA's Young Optometrist of the year in 2013 and Dr. Jennifer McGrath was awarded Pennsylvania's Young Optometrist of the year in 2015. Dr. Withey had a long-standing practice in the New Kensington area before locating to Butler Eye Care.

In order to ensure things run seamlessly at both locations, staff members meet on a

Dr. R. G. Withey

monthly basis to discuss the best ways to serve their patients and the patients benefit from these constant communications. The staff communicates with each other every morning to make sure they are all on the same page and inform one another of any new changes or policies that need corrected. From the moment you step inside either location, it is apparent that the staff members enjoy their work and love their wonderful and loyal patients.

Services at Butler Eye Care and Chicora Eye Care include: comprehensive eye exams to diagnose and treat ocular diseases, glaucoma testing and treatment, emergency eye care, visual field testing, LASIK vision consultations, monitoring possible side effects from high risk medications, and much more. They also, of course, perform glasses and contact lens exams, and they have a wide selection of safety glasses. The Butler location has the largest display of frames in the area to meet all tastes and budgets. A benefit to having multiple locations is the ability to share those frames between both locations to give all patients a nice selection to choose from.

The McGrath's reside locally and are proud parents of two beautiful daughters, Olivia (age 3) and Molly (age 2).
