## Butler County Memorial Park & Mausoleum

has been the leading choice of Butler County residents for over seventy years. As a leader in their field, Butler County Memorial Park & Mausoleum has many choices to offer people regarding their final arrangements. Along with traditional ground burial and regular above ground entombment in the mausoleum, their newly expanded mausoleum has a warm, comforting environment, allowing for visitation at their convenience. Plus, for those who choose cremation, they offer many different types of arrangements, such as inurnment in the climate controlled mausoleum as shown above in the middle picture. Also, as a first to Butler residents, Butler County Memorial Park & Mausoleum is proud to offer lighted glass front cremation niches, in their newly expanded mausoleum. These cremation niches, shown above right, offer the utmost in unique personalization by allowing you to design your cremation urn using photographs of your loved ones.

Since its inception in 1939, the cemetery has always been locally owned by a local family. The current family owners purchased the cemetery in 1967 from another local family, who retired. The fact remains, that each of us has a problem – what to do when a loved one passes away.

Rather than wait until that horrible day comes, why not solve a problem that each of us MUST face by calling the experienced people at Butler County Memorial Park & Mausoleum to arrange a tour of their beautiful mausoleum or their well manicured grounds.
